

# MintReward (RWRD) WhitePaper

**Preserving digital history through blockchain while rewarding the community and participants**

Version 1.1

12/8/24

## **Important Disclaimer**

This whitepaper represents the initial version of the MintReward (RWRD) project and is subject to modifications. The features, tokenomics, and mechanisms described herein may be adjusted prior to and after launch to ensure optimal project performance and community benefit. All token or NFT holders will be notified of any significant changes through official channels.

## **Abstract**

MintReward (RWRD) introduces a revolutionary approach to preserving historical news moments through blockchain technology, transforming significant news events into unique digital collectibles. Our platform enables users to mint NFTs representing daily news stories while participating in a sophisticated reward system that incentivizes long-term holding and active community participation.

## **Table of Contents**

1. Introduction
2. Market Overview
3. Technical Architecture
4. Tokenomics
5. NFT System
6. Reward Mechanism
7. Community Governance
8. Roadmap
9. Security Considerations
10. Conclusion

## **1. Introduction**

## **1.1 Vision**

To create a decentralized platform that transforms significant news moments into valuable digital collectibles, preserving history while rewarding community participation.

## **1.2 Problem Statement**

- Traditional news archival lacks engagement and value appreciation
- Digital news preservation is centralized and controlled
- Limited incentives for preserving historical moments
- No direct community benefit from news preservation

## **1.3 Solution**

MintRewards addresses these challenges through:

- Unique digital artwork representing news stories
- Blockchain-based preservation system
- Community-driven reward mechanics
- Decentralized ownership of historical moments

## **2. Market Overview**

### **2.1 Target Market**

- Digital collectors
- News enthusiasts
- Crypto investors
- Historical archivists
- Digital art collectors

### **2.2 Market Opportunity**

- Growing NFT market
- Increasing digital collectibles interest
- Rising value of historical preservation
- Expanding blockchain adoption

## **3. Technical Architecture**

### **3.1 Blockchain Infrastructure**

- Built on Solana blockchain for:
  - \* High transaction speed
  - \* Low transaction costs
  - \* Scalable infrastructure
  - \* Energy efficiency
- Smart contract-based reward system
- Decentralized NFT storage

### **3.2 Smart Contracts**

- Token contract
- NFT minting contract
- Reward distribution contract
- Lock mechanism contract

### **3.3 Content Integration**

- Real-time news processing
- Custom artwork creation
- Metadata creation
- Rarity assignment

## **4. Tokenomics**

### **4.1 Token Distribution**

Total Supply: 1,000,000,000 RWRD

Launch on DexScreener MoonShot (No Pre-Mine, Rug Pull Protection)

Deflationary token - tokens will be burned based on reward options in section 6.5

Owner and original investors have made an initial purchase of 10,518,566.19 RWRD tokens which may be used in the future for past, current, and future development, marketing, or original investor reimbursement. Any future transactions from this wallet will be communicated to token and NFT holders through official communication channels. The tokens are held in wallet

<https://solscan.io/account/3Fuxe4n5gZ5sfcDK2ZGwVQfG3ChrqA5gzqQHt7zBfsCK>

## **4.2 Token Utility**

- NFT minting currency (Our Rewards NFTs can only be purchased with RWRD)
- Reward distribution
- Community governance
- Platform development

## **5. NFT System**

### **5.1 Minting Mechanism**

- Dynamic NFT generation
- News-based artwork
- Metadata inclusion
- Rarity system

### **5.2 Rarity Structure**

- Base Cards (Common)
- Special Editions (1:100)
- Card Grades (1:250)
- Special Attributes (1:500)
- Limited Editions (1:1000)
- Legendary Cards (1:5000)
- Mythic Elements (1:10000)

### **5.3 NFT Elements**

- Custom digital artwork
- News headline
- Timestamp
- Source attribution
- Rarity indicators
- Special attributes

## **6. Reward Mechanism**

## 6.1 Minting/Rewards Pool

Proceeds from minting will all be stored in a wallet created, owned, and controlled by MintRewards. For each NFT minted the proceeds will be allocated for the following future disbursements:

- 80% Main Reward Pool (Monthly reward distribution to select NFT holders which will be determined by the Solana MintRewards Program)
- 10% Weekly Incentives (Weekly reward distribution to select NFT holders which will be determined by the Solana MintRewards Program)
- 10% Development/Stability - These proceeds will either remain in the Minting wallet or be transferred to a wallet controlled by the developer and MintRewards. Should it be decided that these funds will go to another wallet on a specific schedule, it will be publically noted and shared with token and NFT holders. These funds could be used for any number of activities, including (but not limited to) present, past, and future development, marketing, artist fees, or fees related to NFT minting.

## 6.2 Weekly Rewards

Distribution of the weekly pool. At the moment we plan for there to be 4 awards to be rewarded on a weekly basis and that will be funded from the weekly portion of the mint / rewards pool.

- 1st Place: 40%
- 2nd Place: 30%
- 3rd Place: 20%
- 4th Place: 10%

Example: If there are sales of NFTs for RWRD worth \$200,000 in the previous 7 days, the weekly portion of that which would awarded would be \$20,000 (in RWRD) ( $\$200,000 \times 10\%$ ). The distribution to the 4 awarded NFT holders would be:

- 1st Place - \$8,000 worth of RWRD
- 2nd Place - \$6,000 worth of RWRD
- 3rd Place - \$4,000 worth of RWRD
- 4th Place - \$2,000 worth of RWRD

## 6.2b Monthly Rewards

Distribution of the weekly pool. At the moment we plan for there to be 1 award to be rewarded on a monthly basis and that will be funded from the monthly portion of the mint / rewards pool.

- 1st Place: 100%

Example: If there are sales of NFTs for RWRD worth \$800,000 in the previous 30 days, the monthly portion of that which would be awarded would be \$640,000 (in RWRD) ( $\$800,000 \times 80\%$ ). The distribution to the awarded NFT holders would be:

- 1st Place - \$640,000 worth of RWRD

### **6.3 Early Token Holder Benefits**

- Early Token Holders in the MoonShot token listing will pay 50% off for NFT minting FOREVER (as long as they have RWRD in their wallet at time of bonding). The wallet addresses will be whitelisted for discount off all future NFT mints.

### **6.4 Weekly and Monthly Reward Claim Summary**

There will be 4 options for claiming rewards. Because there are 4 different options, then winners must claim the rewards so that they can select and sign the reward payment option that they desire:

- Immediate
- 6 Month
- 12 Month
- 18 Month

### **6.5 Reward Claim System**

#### **Overview**

The Monthly Claim System is a core feature of MintRewards, providing a sustainable reward distribution mechanism for NFT holders. Each week, one NFT minted within that week is selected to receive rewards from the accumulated reward pool.

#### **Reward Distribution Options and Allocations**

##### Option 1 - Immediate Claim

- Wallet Holder Receives: 50% of allocated reward instantly
- Remaining 50% split:
  - \* 25% burned (increasing token scarcity)
  - \* 25% returned to Monthly Reward Pool which will be added to next monthly reward
- Example for 100,000 RWRD reward:
  - \* Instant Payment: 50,000 RWRD
  - \* Burned: 25,000 RWRD
  - \* Returns to Mint/Reward Pool: 25,000 RWRD

##### Option 2 - 6 Month Distribution

- Wallet Holder Receives 70% of total allocated reward

- Equal monthly payments over 6 months
- Remaining 30% split:
  - \* 15% burned (increasing token scarcity)
  - \* 15% returned to Monthly Reward Pool
- Example for 100,000 RWRD reward:
  - \* Total Payments: 70,000 RWRD (11,666 RWRD monthly)
  - \* Burned: 15,000 RWRD
  - \* Returns to Mint/Reward Pool: 15,000 RWRD

#### Option 3 - 12 Month Distribution

- Wallet Holder Receives 85% of total allocated reward
- Equal quarterly payments over 12 months
- Remaining 15% split:
  - \* 7.5% burned (increasing token scarcity)
  - \* 7.5% returned to Monthly Reward Pool
- Example for 100,000 RWRD reward:
  - \* Total Payments: 85,000 RWRD (21,250 RWRD quarterly)
  - \* Burned: 7,500 RWRD
  - \* Returns to Mint/Reward Pool: 7,500 RWRD

#### Option 4 - 18 Month Distribution

- Wallet Holder Receives 100% of total allocated reward
- Two equal payments over 18 months
- Example for 100,000 RWRD reward:
  - \* Total Payments: 100,000 RWRD (50,000 RWRD bi-annually)
  - \* No remainder to return to Mint/Reward pool

### **Distribution Schedule Summary**

For 100,000 RWRD Example:

Claim Option	Winner Receives	Burned	Returns to Pool	Timeframe
Immediate	50,000 RWRD	25,000	25,000	Instant
Monthly	70,000 RWRD	15,000	15,000	6 months
Quarterly	85,000 RWRD	7,500	7,500	12 months

### **Solana Program/Contract Implementation**

The Solana Program/Contract will:

- Calculates correct distribution amounts
- Burns tokens for immediate claims
- Returns unclaimed portions to reward pool
- Manages vesting schedules
- Executes periodic payments
- Updates pool balances

## **7. Community Governance**

### **7.1 Community Structure**

- Discord / Telegram -based community
- Phased channel development
- Role-based access
- Community initiatives
- Moderated discussion channels

### **7.2 Governance Mechanisms**

- Community voting
- Proposal system
- Development direction
- Feature requests
- Platform improvements

## **8. Roadmap**

### **Phase 1: Foundation & Launch (0-25%)**

- Establishing our core infrastructure and community
- Launching our token on pump.fun or MoonShot with transparent tokenomics
- Building our initial community of news enthusiasts and collectors
- Establishing our core infrastructure and community

- Establishing our Discord ecosystem

### **Phase 2: Development & Growth (25-50%)**

- Development and implementation of the NFT minting system
- Deploying smart contracts for the rewards
- Scaling our NFT generation capabilities
- Introducing advanced rarity systems for NFTs

### **Phase 3: Reward Program (50-75%)**

- Weekly Rewards Pool distribution starts
- Marketing efforts in place and in full force
- Launching enhanced website features including NFT showcase galleries and reward tracking dashboards
- Development and delivery of referral system with rewards

### **Phase 4: Advanced Innovation (75-100%)**

- Expanding rewards program and addition of other rewards systems
- Continued website development for NFT showcases
- NFT holder voting system

## **9. Security Considerations**

### **9.1 Smart Contract Security**

- Multiple audits from reputable firms
- Time-locked contracts
- Emergency pause functionality
- Multi-sig implementation
- Regular security updates
- Vulnerability monitoring
- Incident response plan

### **9.2 Platform Security**

- Decentralized storage

- Transparent mechanisms
- Regular security updates
- Community monitoring
- Access control systems
- Data integrity protection
- Real-time threat detection

### **9.3 Risk Mitigation**

- Regular audits
- Insurance coverage
- Security best practices
- Community alerts
- Transparent reporting
- Continuous monitoring
- Quick response protocols

## **10. Conclusion**

MintRewards (RWRD) represents a revolutionary approach to preserving digital history through blockchain technology. By combining unique digital artwork, community engagement, and sophisticated reward mechanics, we create a sustainable ecosystem that benefits all participants while preserving important historical moments.

The platform's innovative reward structure, combined with its focus on historical preservation, creates a unique value proposition in the blockchain space. Through careful tokenomics, sustainable reward mechanisms, and strong community governance, MintRewards aims to become a leading platform for digital collectibles while providing real value to its participants.

Our commitment to security, transparency, and community engagement sets the foundation for long-term success and sustainable growth. As we progress through our roadmap, the platform will continue to evolve and improve based on community feedback and market demands.

We invite you to join us in this journey of preserving digital history while building a rewarding and engaging community.

### **Legal Disclaimer**

This whitepaper is for informational purposes only and does not constitute financial advice or a solicitation to purchase or sell any securities or cryptocurrencies. The MintReward (RWRD) token and associated features are subject to applicable laws and regulations.

Important considerations:

#### 1. Regulatory Compliance

- Users must comply with their local regulations
- Platform features may be restricted in certain jurisdictions
- Regulatory requirements may change over time

#### 2. Risk Factors

- Cryptocurrency investments carry inherent risks
- Market volatility can affect token value
- Technical risks exist in blockchain technology
- Past performance does not guarantee future results

#### 3. User Responsibility

- Users are responsible for their own due diligence
- Private keys and wallet security are user responsibilities
- Users should understand platform mechanics before participating

#### 4. Forward-Looking Statements

- This document contains forward-looking statements
- Actual results may differ from projections
- Development roadmap subject to change
- Features and timelines may be modified

#### 5. No Guarantee of Profits

- Rewards are not guaranteed
- Market conditions may affect returns
- Platform participation carries risks

- Users should invest responsibly

The information contained in this whitepaper is subject to change without notice. The MintRewards team reserves the right to modify any platform features, tokenomics, or mechanics to ensure the long-term sustainability and success of the project.
